2.3 - L'installation d'un éditeur de text

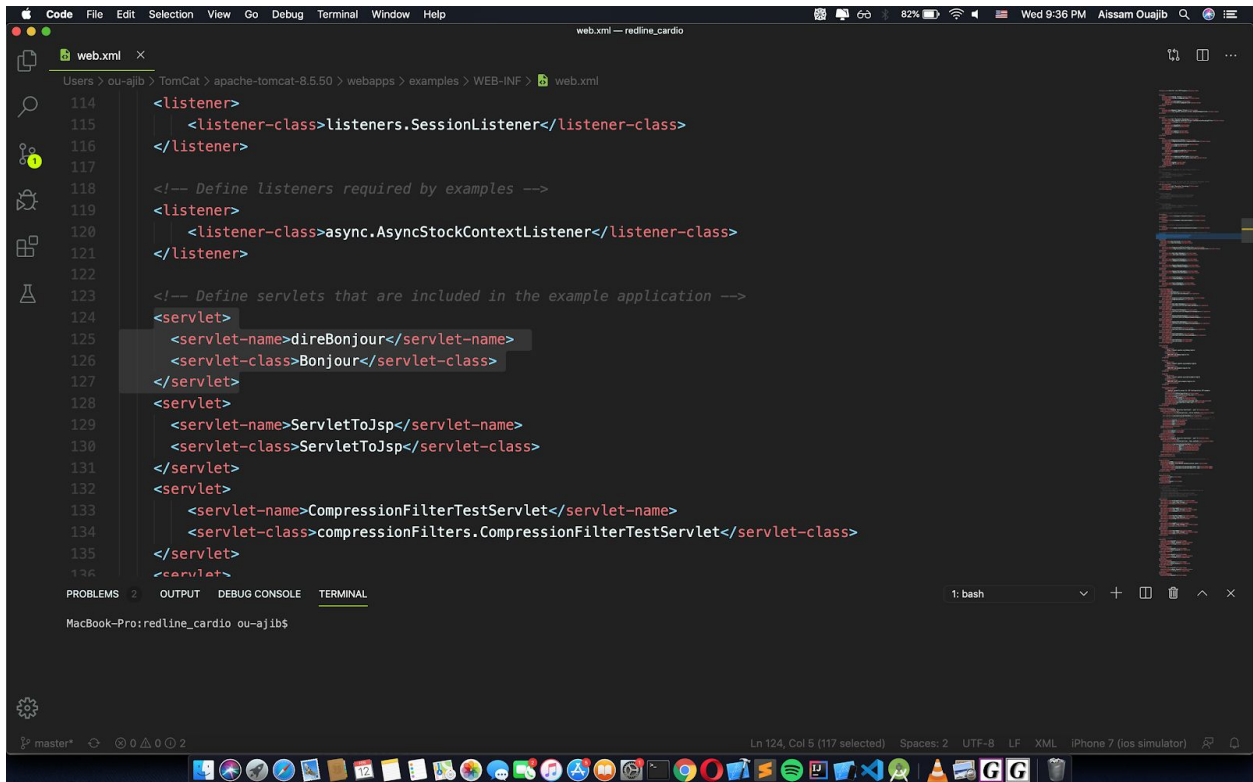

3 - Modification, compilation et lancement de servlets

L'ajout du Class Path et le changement

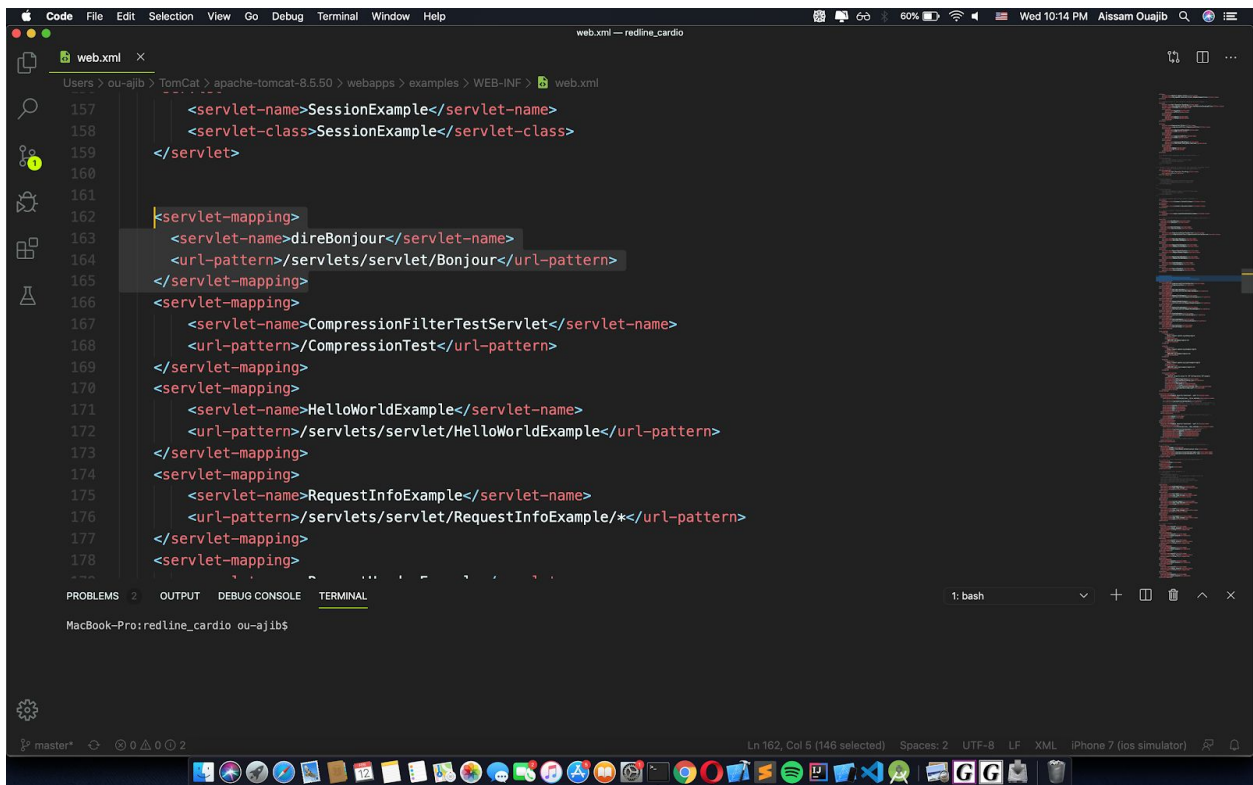

3.1 - Par definition d'un alias

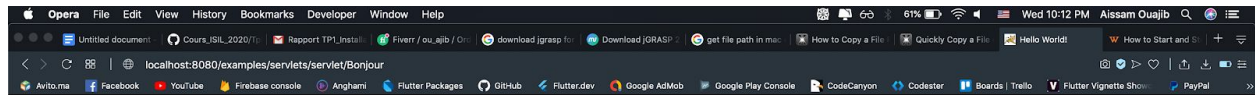

The screenshot shows the VS Code editor with the `web.xml` file open. The file is located at `Users > ou-ajib > TomCat > apache-tomcat-8.5.50 > webapps > examples > WEB-INF > web.xml`. The code defines listeners and servlets. The `<listener>` section includes `listeners.SessionListener` and `async.AsyncStackContextListener`. The `<servlet>` section includes `direBonjour`, `ServletToJsp`, and `CompressionFilterTestServlet`. The terminal at the bottom shows the command prompt `MacBook-Pro:redline_cardio ou-ajib$`.

```

115     <listener-class>listeners.SessionListener</listener-class>

The screenshot shows the VS Code editor with the `web.xml` file open. The file is located at `Users > ou-ajib > TomCat > apache-tomcat-8.5.50 > webapps > examples > WEB-INF > web.xml`. The code defines servlet-mappings for `SessionExample`, `direBonjour`, `CompressionFilterTestServlet`, `HelloWorldExample`, and `RequestInfoExample`. The terminal at the bottom shows the command prompt `MacBook-Pro:redline_cardio ou-ajib$`.

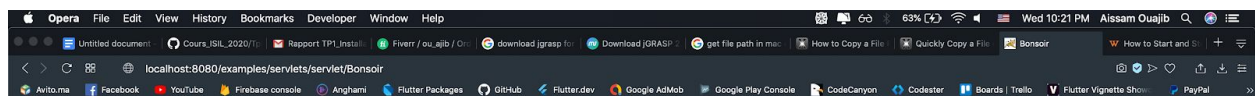

```
